

JERWEN LIBRES RELOZ

Full-Stack .NET Developer (Web/Desktop/Mobile)

<https://github.com/wenreloz> | <https://www.linkedin.com/in/wenzolerjerwen@gmail.com> | +639 0609 46192

SUMMARY

Full-stack developer with 7+ years building and maintaining enterprise systems across multiple business domains, **with a strong focus on finance and healthcare systems**, on web, desktop, and mobile platforms. Strong in **C#/.NET, ASP.NET Core APIs, SQL Server, VueJS, and Angular (10+)** with experience leading projects end-to-end: requirements, architecture, UI, database design, testing, deployment, and support. Comfortable in Agile teams and production environments.

CORE SKILLS

Backend: C#, VB.NET, ASP.NET Core, Web APIs, LINQ, Entity Framework, ADO.NET

Frontend: Angular (10+), Vue3, JavaScript/TypeScript, HTML/CSS, Bootstrap, jQuery (legacy)

Desktop/Mobile: WinForms, WPF, Xamarin/MAUI, Android (Kotlin/Java)

Database: SQL Server (T-SQL), MySQL, SQLite (migrations, performance, maintenance)

Tools/Infra: Git, IIS, Nginx/Apache, Visual Studio, VS Code, SSMS, Ubuntu/Windows, NuGet, NPM, Android Studio

Practices: Unit testing, debugging, documentation, deployment, server management, Agile/Scrum

EXPERIENCE

.NET Developer

Adaugeo Healthcare | Pendleton, OR (Remote) | Oct 2023 – Present

- Develop and maintain healthcare/clinical software based on client requirements using **.NET + SQL**.
- Debug production issues, implement fixes, and improve reliability of existing modules.
- Write and execute **unit tests** to support stable releases.
- Produce technical documentation (requirements/specs) aligned with SDLC processes.

Tech: C#, .NET, SQL Server, Rest APIs, IIS, Git

Software Developer

Signant Health | Blue Bell, PA (Remote) | Sep 2022 – Oct 2023

- Built and maintained clinical trial software solutions supporting pharmaceutical clients.
- Implemented features and resolved defects based on requirements, QA feedback, and stakeholder input.
- Supported delivery using a proprietary no-code platform (configuration + custom logic where needed).
- Maintained documentation and ensured changes aligned with release standards.

Tech: Trial Studio, Java, Python, Jira, SQL Server, PowerBI

Team Lead / Full-Stack Developer

IPSUMPH Digital Services | Quezon City | Mar 2021 – Sep 2022

- Led development of systems from scratch: requirements → architecture → implementation → deployment.
- Designed **database schemas** and implemented business workflows across web/desktop modules.
- Built UI/UX and collaborated with stakeholders on scope, timelines, and SDLC milestones.
- Delivered enhancements, bug fixes, and maintenance documentation for long-term support.

Tech: PHP/Laravel, NGINX/Apache, Linux VPS, Redis, Kotlin, Vue3, C#/ASP.NET, BigCommerce, Angular, SQLite, Git

Senior Programmer / Full-Stack Developer

Astra Multimarket Corporation | Quezon City | Aug 2019– Mar 2021

- Delivered new system features and enhancements aligned with business process needs.
- Designed database architecture and implemented UI and backend logic.

Tech: PHP/Laravel, NGINX/Apache, Linux VPS, Redis, Kotlin, Vue3, ASP.NET, BigCommerce, Angular, SQLite, Git

Junior Programmer

Organelles Holdings and Management Co. Inc. | Alabang | Apr 2018 – Aug 2019

- Designed, developed, tested, and maintained applications solving business problems.
- Created process flow documentation and handled issue analysis and fixes through production lifecycle.

Tech: VB.Net, PHP/Laravel, C#, Git

EDUCATION

BS Information Technology | 2014 – 2018

Southern Leyte State University

PROJECTS

Inventory Management System (Trucks/Heavy Equipment Parts Importation and Assembly)

Laravel, VueJS, Linux VPS, CICD, Git

- Built an inventory platform to track parts importation, assembly workflows, and stock movement.
- Implemented role-based access, transaction logging, and searchable inventory/parts records.
- Deployed to **Linux VPS** with **CI/CD pipelines** for reliable releases.

Laboratory Information System + Billing & Reporting

ASP.NET Core, SQL Server, Angular, APIs and Integrations, IIS Server, Git.

- Developed LIS and billing modules with standardized coding support for lab orders/results and billing workflows.
- Built integrations for exchanging lab data with external systems via APIs/interfaces.
- Deployed and maintained releases on IIS, with version control in Git.
- Familiar with ICD-10 / HL7 / CPT Coding / LOINC / SNOMED CT / NPI / NPPES / HIPAA in healthcare software contexts.

Loan and Accounting Management System

C# Windows Form, SQL Server, Git, xUnit/nUnit

- Created a desktop-based loan and accounting system with SQL-backed records and reporting.
- Implemented validation and calculation logic and added automated tests using **xUnit/NUnit**.
- Delivered maintainable modules with clear documentation and version control in **Git**.

ECommerce (Trays and Canopy)

Laravel, VueJS, BigCommerce, Linux VPS, APIs and Integrations

- Implemented e-commerce features and integrations using **BigCommerce APIs**.
- Built custom pages/modules using **Laravel + Vue.js** and deployed on **Linux VPS**.
- Integrated third-party services for product/order synchronization.
